Concerns received from Pacific Unlimited on July 19, 2022

1. There continues to be a misunderstanding of the software subscription. The factories will not sell subscription based software for 15 years as they cannot predict the cost of software 15 years in advance. It is only available on an annual subscription basis and can be renewed annually at the then market price. Why would the government waste money spending for software 15 years in advance even if it was available? This is not practical.

Response:

The requirement is standard and is based on the agency's needs.
